RE: Report after Restoration of Natural Gas Service
Docket No. NDI-2020-___-G

Dear Ms. Boyd:

Dominion Energy South Carolina, Inc. ("DESC") hereby submits the following written report in compliance with Public Service Commission of South Carolina ("Commission") Regulation 103-414, which requires DESC to notify the Commission and the South Carolina Office of Regulatory Staff ("ORS") by telephone of "any interruption of [natural gas] service affecting its entire system or major division thereof, or any major community or any important division, consisting of at least fifty customers, of a community . . . as soon as practicable after it comes to the attention of [DESC]" and to provide a complete written report to the Commission and ORS after restoration of service, if the interruption of service is more than six hours in duration.

On April 28, 2020, 11:45 a.m. DESC received notice that a third-party contractor hit a 2-inch plastic main on Summer Valley Drive at the entrance to the Summer Valley Subdivision in Blythewood, South Carolina, severing the main. The natural gas line had been marked, but the marks were approximately 4-feet off the actual location of the natural gas line.

DESC arrived on site at 12:25 p.m. and secured the leak at approximately 2:20 p.m. on April 28, 2020, by squeezing the pipe, which resulted in the loss of service to 152 customers because the severed main is the only feed line into the neighborhood. In compliance with Commission Regulation 103-414, DESC provided telephonic notice to the Commission and the ORS of the interruption of natural gas service affecting more than fifty (50) customers as a result of a severed natural gas line on Summer Valley Drive at the entrance to the Summer Valley Subdivision in Blythewood.

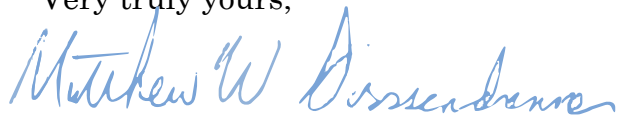

The Honorable Jocelyn Boyd

Page 2

DESC made the necessary repairs, and natural gas service was restored to the damaged section of the main at approximately 5:15 p.m. on April 28, 2020. DESC began the process of restoring service to customers at approximately 5:45 p.m. that same day. At approximately 8:30 p.m. on April 28, natural gas service had been restored to 120 affected customers. The remaining affected customers were not present to allow DESC access for service to be restored. Service at each of those premises will be restored once a customer contacts DESC to request such service.

By copy of this letter and pursuant to Commission Regulation 103-414, DESC is providing the ORS with this report.

If you have any questions, please do not hesitate to contact us at your convenience.

Very truly yours,

Matthew W. Gissendanner
